

How to locate a specification on Governors

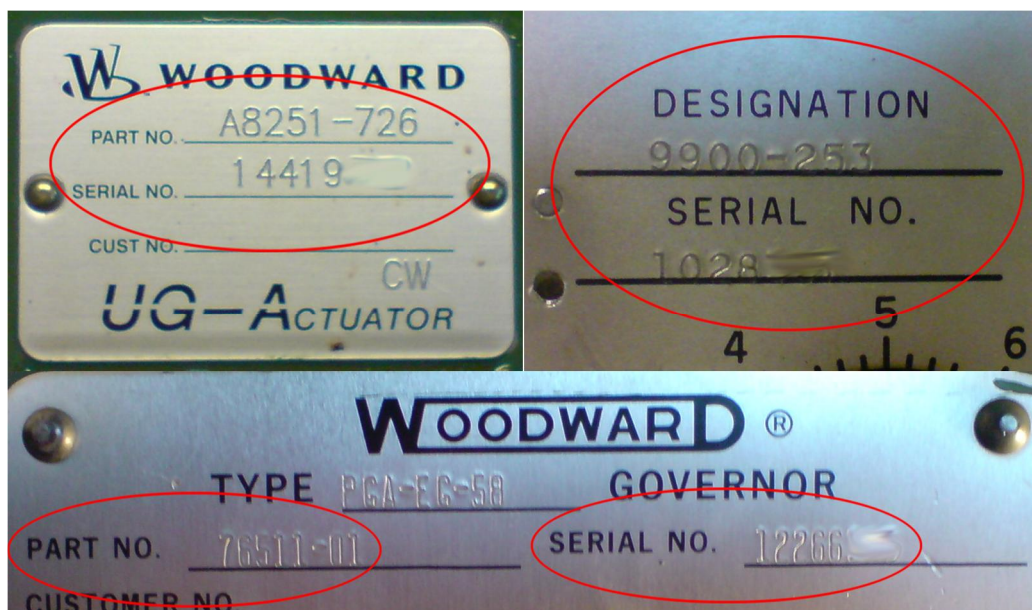

Always quote the designation/part number and serial number when ordering parts. This is essential. If you need help, please contact us for more information.

We need these numbers in addition to the model/type number because your governor will have several unique parts appropriate for the precise operating characteristics of your engine or turbine.

Only by using exactly the right parts will you be able to restore the equipment to its original specification. If incorrect parts are used, the governor will not provide the same operating characteristics, which could result in serious damage to the engine or turbine.

To help you identify the parts you need to carry out routine maintenance, contact us to get a free copy of the latest edition of the Woodward bulletin for your governor.

Here are a few examples of the name plates of various units:

Please do not hesitate in contacting us if you have any further questions.
